KH P 1	Vireshwar Temple and Vireshwar Tank	Khopoli	State Government	Religious, Water Source, Recreational	Community Open Space and Waterbody	Late 18th century	A(arc), A(cul), B(per), I(sce)	<p>The Vireshwar temple and the reservoir was built by the Peshwa's celebrated minister, Nana Phadnis (late 18th century). It is a modest temple dedicated to God Shiva with a large waterbody next to it.</p> <p>It is a typical temple of Peshwa period with a square Girbhagriha and a rectangular mandapa. The Shikhara is a plain multi-tiered shikhara with modules of rectangular niches arranged in each tier. The temple is enclosed in a stone wall with an entrance with 'ispindar' arch. A small rectangular opening in the west wall connects to the tanks located on the lake bank.</p> <p>The lake is oval in shape and constructed over a natural spring. The lake is edged with dressed stone and punctuated with flights of steps to access the water.</p> <p>A set of tanks on the bank indicate an evolved water management system."</p> <p>The tank and the temple are the only open spaces for the town and are therefore of Importance.</p> <p>A temple and tank constructed by a prominent person of the Peshwa rule in a place away from the centers of activity (Pune, Satara, Kolhapur, Nasik.)</p>	I
